

# FACTS COMPACT:

## ISO TUBE X3D

With the iso tube X3D Culimeta presents a development which sets up new standards in its technical conception, efficiency and quality.

### The Material

The iso tube X3D is produced of E-glass fibres. The advantages are:

- completely insulating
- uninflammable
- not aging

### Health

Particularly in practice the important advantage of the iso tube X3D is shown. Where normal products of this kind show deleterious effects in production and use, the iso tube X3D is medically impeccable (logically harmless)

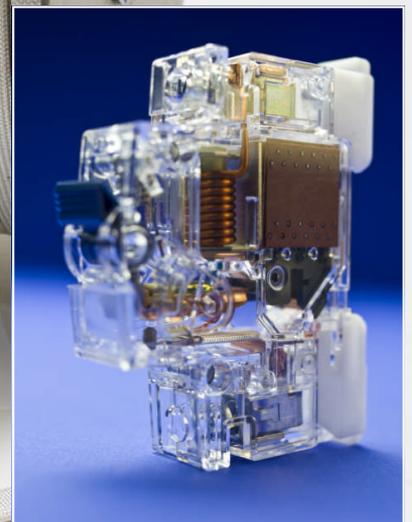

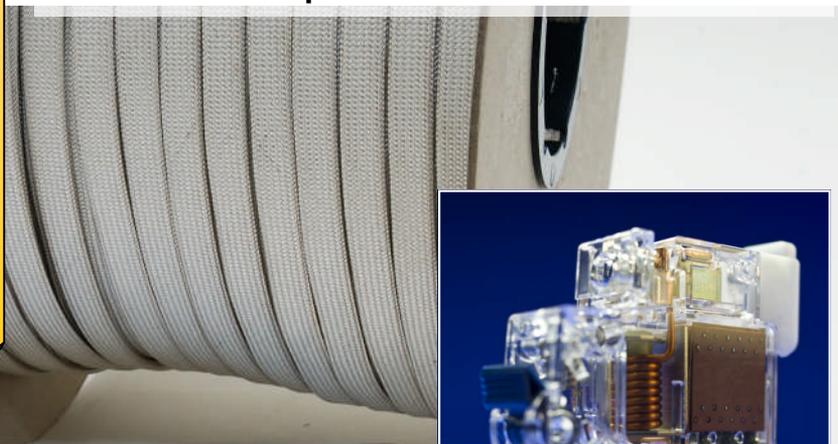

### Resistance to temperature and tropical conditions:

The iso tube X3D guarantees resistance to temperature (450°C) and tropical conditions

In close co-operation with experts the iso tube X3D obtained construction details, which you will often search in vain among other comparable products:

- quick, economical and thus cost-saving assembly*
- it is guaranteed that it will not become frayed*
- high accuracy in measurement*
- resistant against oils and grease, solvents, aromatic hydrocarbons, alkali, etc.*
- unscopic*

The iso tube X3D will be delivered continuously rolled on rings or if requested specially cutted up to customer's requirements.
